

# *Ox-eye Sunflower (false or early sunflower)*

## *Heliopsis helianthoides*

Not a true sunflower, Ox-eye Sunflower is easy to grow and a good source of cut flowers, producing orange-yellow flowers up to two inches wide, growing singly atop 90 cm branches. A great clay-buster!

Full sun to partial shade

Dry to medium soil types

Up to 90 cm tall

July through September

✓ Butterflies, bees & songbirds
