

Lanceleaf Coreopsis

Coreopsis lanceolata

This daisy-like flower with bright yellow rays on single, elongated stems makes an excellent cut flower that lasts about seven to ten days. Under ideal conditions this beautiful wildflower will bloom its first year and its foliage makes an attractive ground cover throughout the year.

Full sun – part shade

Dry – medium moisture, sand to clay soil

30-60cm tall (1-2ft)

July bloom

✓ Butterflies

Deer resistant
