

KEEP IT SUPERIOR

SECONDARY/POST-SECONDARY PROGRAM

This program is designed to educate students about how pollutants end up in Lake Superior. Discussion focuses on watersheds, the differences between storm sewers and sanitary sewers, and how these are connected to Lake Superior. Students will learn what they can do to help prevent pollutants from contaminating our water resources.

The program has been updated with data from our LittaTrap collections throughout the city. Students will get to see what really ends up in Lake Superior.

This program involves an interactive presentation with engaging activities, all included in the program fee!

LEARNING GOALS

**We are learning about the importance of water in our lives.
We are learning how to protect our water resources.**

Please contact us at education@ecosuperior.org if you have any questions regarding our programs.
