

PREVENTING THE INVASION

Secondary/Post-Secondary Program

This program is designed to educate students about invasive species specific to Northwestern Ontario. Discussion focuses on biodiversity, environmental impact, and preventative measures used to combat the presence of species such as the Emerald Ash Borer, Round Goby, and Sea Lamprey.

This program involves an interactive presentation with real-life specimens, and engaging activities all included in the program fee!

CURRICULUM CONNECTIONS

Grade 9 (SNC1W)

Strand B: Biology - Sustainable Ecosystems and Climate Change

Overall Expectation B2.

Grade 9 Geo (CGC1D)

Strand B: Interactions in the Physical Environment

Overall Expectation B1.

Grade 11 (SVN3E)

Strand B: Human Impact on the Environment

Overall Expectation B1.

Grade 11 (SVN3M)

Strand B: Scientific Solutions to Contemporary Environmental Challenges

Overall Expectation B3.

LEARNING GOALS

We are learning about how invasive species in Northwestern Ontario are impacting habitats and biodiversity.
